

PrimeVision™ Provides Operations Transparency

Data is transforming how supply chains are managed. We've made it possible for you to have transparency in every aspect of what we do, every day, to help you achieve operational efficiency. We've developed PrimeVision — an innovative technology designed with you in mind. Our PrimeVision platform will give you smart insight, when you need it, where you need it through every stage of partnering with us.

PrimeVision is our customizable technology platform which allows management to monitor operations to ensure ongoing efficiency and optimization continually. It is an easy-to-use cloud-based dashboard that provides continuous transparency into all pallet activity. Whether you want to see inventory, quality counts, supply chain audits, safety/sustainability compliance, delivery data, shipping status, rebates and more, you'll find it in one easy to access portal. We're continually investing in technology to drive better decision making for our customers.

Customized Reports – weekly or monthly reports by location — include detailed pallet activity, such as total pallets purchased, recycled, rebates and more.

Site Portal – transparent management tracking system to improve operational efficiency with visibility into order status by location, by date and type.

Data Dashboard – customizable data views such as program KPIs and trending; can view by region, site, orders, quantities, rebates, sustainability goals and more.

“Working collaboratively with Prime360 helped us envision operational success. Using their technology, we were able to view what needed to be changed. We made improvements and it impacted our performance across the board. The improvements resulted in faster decisions, streamlined operational procedures, lower costs and improved profitability.”

– National Retail Company

PrimeVision gives you transparency into your entire supply chain helping you reduce risk, enhance efficiency, improve profitability and drive sustainability.
