

Strategic Solutions Create Value

While our history is steeped in distribution and pallet management, we're much more than this. We have the largest network of pallet mills in the industry and we're growing. Combined with our PrimeVision™ technology, which gives you transparency into your supply chain operations, we deliver what no other firm can.

We're supply chain innovators and environmental stewards, committed to continuous improvement, helping you achieve and exceed your goals. We create customized solutions by analyzing every aspect of your operation using market and field data, on-site interviews, distribution surveys and more.

The result is to identify where you can streamline your processes, green your operations and improve safety for your employees and your products.

Best-Practice Solutions

- Pallet Design and Analysis
- Pallet Process Engineering
- Supply Chain Audits help optimize flow and operations
- Pallet Optimization Programs (POP) ensures quality pallets stay in your supply chain
- Pooled Pallet Optimization
- Market Intelligence/Benchmarking

<p>Total Cost and Benefit Programs from transportation options to pallet materials, recycling and more.</p>	<p>Continuous Improvement programs — enhance quality and yield — reduce costs</p>	<p>Pallet Optimization Programs — Improve sorting quality, repair, reuse and recycle processes</p>
--	---	---

This unmatched volume, flexibility and scalability help customers improve their profitability with better solutions, implementation support, transparent reporting, improved yield and rebates.

Every day we help our customers implement best practices across their supply chain — enhancing operational efficiency by facilitating risk reduction, streamlining delivery processes, lowering carbon footprints and improving profitability.

Pallet Optimization Programs (POP)

We offer a unique service to our customers that encompasses the review of every pallet to determine quality and safety compliance. Our team inspects all inbound pallets (from every vendor) and ensures the pallets meet the specifications you require. We document all data — vendor, description, number of cases, PO number, carrier and more. Pictures are taken to substantiate the data and ensure clarity. The outcome of our vendor compliance study determines if vendors are bringing value to your supply chain. The program:

Helps ensure vendors comply with safer quality pallet guidelines

Increases pallet revenue:

- establishes charge backs for non-compliant pallets
- identifies reusability – less need to purchase new pallets

Reduces the amount of wood scrap leaving the distribution center

Reduces environmental impact

“Working with Prime360 we improved our quality and retained more pallets in our supply chain. We just re-signed our contract with Prime360. We also recently conducted a vendor compliance study which showed our quality improved over 20%.”
