

Sustainability Initiatives Protect Our Environment

As committed environmental stewards, we're passionate about helping our customers improve their sustainability efforts. We collaborate with our customers and provide creative solutions to reduce packaging and pallet impact on the environment.

- We **reduce your carbon footprint** by optimizing transportation, freight and packaging materials.
- We provide reports giving you **visibility** and **transparency** into your safety and sustainability goals.
- We utilize the EPA calculator to review **sustainability** impact and **improvement**.
- We provide **high-quality products** at competitive prices — reducing your cost of ownership and risk exposure.

1,000+ Partner Strategic Alliance Network

Our diverse network of partners is extensively vetted for performance, reliability and financial health. Our partners are continually monitored to remain in our strategic alliance and to serve our customers. Most have over 25 years in the industry and are certified by the National Wooden Pallet & Container Association (NWPCA).

*Total Pallet Management (TPM) Program helped customers reduce their carbon footprint = **95,950 cars** off the road in one year.*

*Pallet Compliance Program (POP) saved **\$8 Million in one year** Estimated Annualized Income*

Our Partners...
Manage 250+ Million Pallets Annually

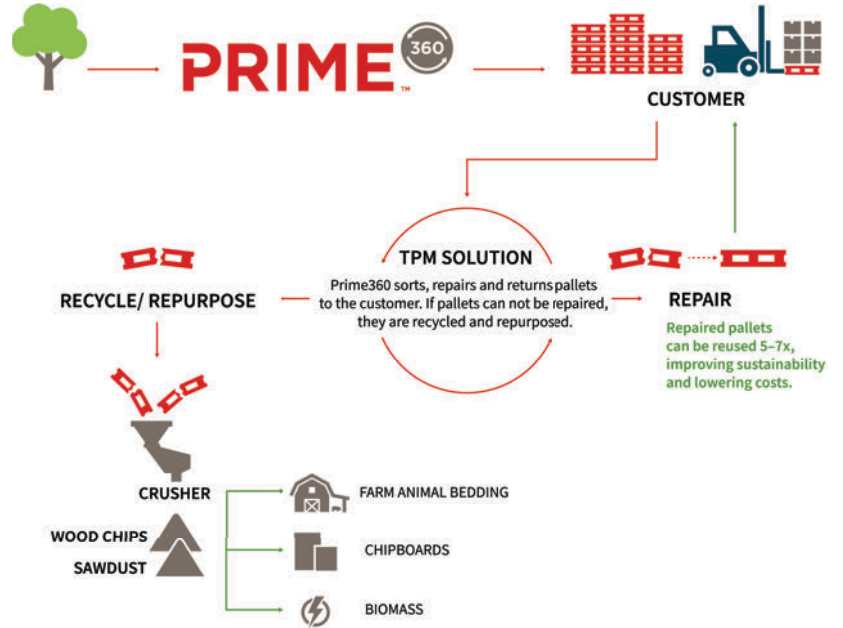

Divert 85% of End-of-Life Pallets from Landfills

Has a Geographic Presence throughout North America

Our Goal is to Keep Pallets in the Supply Chain and Out of Landfills

Pallet Lifecycle Benefits

Minimizing waste, recycling and repurposing can reduce greenhouse emissions, conserve water and energy and provide alternative use products such as biofuels, chipboards and farm animal beds. This process enables our customers to reduce landfill waste and help improve total cost and sustainability efforts.

TPM Program delivered measurable sustainability improvements — reduced average monthly CO2 emissions and 3,908 metric tons per month

Pallet Lifecycle

A pallet recycling system enables our customers to reuse the same pallet 3-4 times per year for up to an average of 8 years.
